

Computer Science 2 Project	Team Members:	Jayasinghe, Majam
Group Progress Report		
3rd Quarter		
<b>Week 4 – Jan 30, 2026</b>		
<b>GOAL</b> State your goal for the Week	<b>DATA COLLECTED</b> State/list the data collected relevant to your project	<b>PROGRESS</b> State the progress you have made so far by the end of the week
Learn Pyside6	Watched videos that teach us how to use PySide6	We know more advanced stuff now like how to improve the interface
Revise code to suit Pyside6	Just import pyside6 and make adjustments	Has some errors
<b>STRENGTH</b>		
PySide6	Can easily convert python code to actual applications	Just started learning it for now
VsCode	Helps with making the code	We know how to use it and code with python in general
Easy to use interface	We know what it should look like and what to use to make it	We're learning how to use the library to help us make it
Helps people track their spending	Many students have trouble with tracking their expenses so this can help	We made the main code and functions for it

<b>AREAS FOR DEVELOPMENT</b>		
Knowledge in PySide6	We found learning materials for it	We've watched some videos about it and have learned how it works
Time and task management	We have a lot of other academic and non-academic tasks to do so we realized that we have to manage our time better	We're trying to manage our time better and it's been rough so far but we can do it
<b>STRATEGY FOR SUCCESS</b>		
Proper time and task management	We need to improve on this area like a lot due to our workloads academic and non-academic	We're trying our best and so far have made some progress like making to do lists and when to do those things based on urgency and importance
Lessening distractions	We sometimes lose our focus and get distracted by friends and sports	We've started focusing more on our academics and it's difficult but we're not ones to back down from a challenge
Getting more sleep	We haven't really been keeping track of our sleep quality therefore can't focus sometimes	We're trying our best to get better sleep but it appears to be slightly difficult so not much progress has been made
